IME's Wiki

Here you can find some information about your digital life on our institute.

Survival Guide

To make a long history short, you'll absolutely need to:

1. Create an unique password;
2. Create an e-mail account (@ime.usp.br/@usp.br);

3. Subscribe to your postgraduate program's mail list

   Para os estudantes dos programas de pós-graduação do instituto, temos as seguintes listas que recebem avisos e informes do instituto:

   Para se inscrever, basta usar os links abaixo.

   - g-posbio - Bioinformática
   - g-posmac - Ciência da Computação
   - g-posmae - Estatística
   - g-posmap - Matemática Aplicada
   - g-posmat - Matemática
   - g-posmpem - Mestrado Profissional em Ensino de Matemática

   As listas devem aceitar automaticamente inscrições de emails do domínio usp.br (incluindo @usp.br, @ime.usp.br e @alumni.usp.br).

   Também temos as listas de pós-doc cuja inscrição se dá de forma manual via solicitação por email à SI. São estas:

   - g-posdocmac - Ciência da Computação
   - g-posdocmae - Estatística
   - g-posdocmap - Matemática Aplicada
   - g-posdocmat - Matemática

Serviços

We provide to our community a range of services. Some of them require the *unique password*, while others do use a local account on our internal network. There's a more comprehensive description of those services here.

Email

Currently, our e-mail accounts (@ime.usp.br) are provided by Google. The same goes for @usp.br accounts. To create an e-mail account, you should login with your unique password to https://id.usp.br/ and follow the instructions. After a few minutes, you can access it via https://email.usp.br.

Do not forget to subscribe to your postgraduate program's mailing list!

Para os estudantes dos programas de pós-graduação do instituto, temos as seguintes listas que recebem avisos e informes do instituto:

Internet

Internet access is provided campus-wide by eduroam. To be able to use it, follow the instructions at their website. If you need to connect a device to our ethernet ports, be sure to add your device to our database at https://copaco.ime.usp.br.

IME's System Account

The account on our internal network gives access to our local computing resources. To create this account, you'll need the aforementioned e-mail account. Then, just log in to https://criaconta.ime.usp.br and follow the instructions.

Some of our available resources:

- access to our labs, printers and personal webpage;

- two gigabytes of disk quota (shared between labs and webpage);
- printers “moby” (bloco A, room A13), “escada” (bloco A, second floor, near the auditorium) and “compasso” (bloco B, first floor, near the elevator);

Please be aware that we **do not** ask anybody to send any password over the wire. If you receive any e-mails about any procedure envolving your password, just ignore it. Or report it to us, if unsure.

When dealing with senstive files, it's generally a good idea saving them to the “private” folder, at your home directory.

There's also other types of accounts: institucional accounts (project-wide accounts, departaments etc.) and purely local accounts (with no e-mail associated, using the `-local` suffix). Those types of accounts can be requested at the same site (https://criaconta.ime.usp.br), albeit only by faculty and administrative staff.

USP systems

A fair share of the systems available to students and staff is located at https://uspdigital.usp.br/, where you can find links to nearly all systems integrated to the unique password system. One of them, and, perhaps, the more important is Janus, the academic portal for postgraduates.

As per usual, to access those systems, you must have an USP number and already created your unique password at the first access.

Howeve, there are a few noteworthy systems not listed at https://uspdigital.usp.br/:

- Libraries: http://dedalus.usp.br/;
- USP-wide IT ticket: https://atendimentosti.usp.br/;
- E-mail account creation: https://id.usp.br/;
- IME's local systems: http://sistemas.ime.usp.br/.
